PROFILE

IT Support Analyst and Help Desk Technician with 3+ years of hands-on experience delivering service desk and end-user support in enterprise environments serving 1,000+ users. Skilled in Microsoft 365 and Azure (Entra ID) administration, along with troubleshooting across Windows Server, IIS, MSSQL, networking, and POS systems. Experienced in managing high-volume ticket queues through JIRA, Autotask, and ServiceNow while maintaining SLA-compliant response times. Adept at endpoint management using Intune, JAMF, NinjaOne, and remote support tools to keep distributed systems secure and reliable. I bring a web development background (HTML, CSS, JavaScript, React, SQL) that helps me build SOPs, automate workflows, and enhance technical operations.

TECHNICAL EXPERTISE

Cloud & Identity Administration: Microsoft 365, Microsoft Entra ID (Azure Active Directory), On-Premises Active Directory, Group Policy Objects (GPOs), Exchange, SharePoint, OneDrive, User Lifecycle & License Management
Endpoint & Device Management: Microsoft Intune, JAMF, ManageEngine, NinjaOne, DATTO, Device Imaging & Deployment, Lifecycle & Asset Management, Windows 10/11, macOS
Remote Support Tools: RDP (Remote Desktop Protocol), TeamViewer, ScreenConnect, Remote & On-Site End-User Support
Networking: TCP/IP, VPN, LAN/WAN, Routing & Switching, Wi-Fi / Wireless Access Points, Network Troubleshooting (ping, traceroute, ipconfig), Routers & Switches
Servers & Monitoring: Windows Server, IIS (Web Content Management), Microsoft SQL Server (MSSQL), SQL Server Management Studio (SSMS), System Monitoring, Service Management, Uptime Maintenance
Security & Compliance: Microsoft Defender, Endpoint Security & Configuration Compliance, Access Control, Security Awareness Guidance
Ticketing & ITSM Platforms: JIRA, Autotask, ServiceNow, SLA Management, Incident & Service Request Handling
Collaboration & Productivity: Microsoft Teams, Microsoft Office, Slack, Audio/Video Conferencing & Telephony, Microsoft Admin Portals
Web & Programming: HTML, CSS, JavaScript (ES6+), React, Redux, Node.js, PHP, SQL / T-SQL, Git, Visual Studio Code

PROFESSIONAL EXPERIENCE

Desktop Engineer — San Diego Zoo (Contract) | San Diego, CA **June 2026 – Present**

- Configure, deploy, and install Windows and macOS operating systems, application-specific software, and computer peripherals to ensure end users are fully equipped and productive from day one.
- Perform in-depth troubleshooting and problem diagnosis across endpoint devices and systems, resolving issues spanning operating systems, application software, and hardware peripherals.
- Administer and maintain enterprise endpoint management platforms, including Microsoft Intune and JAMF, to enforce configuration standards and streamline device provisioning.
- Deliver comprehensive end-user support through on-site, off-site, and remote channels, including hands-on assistance, phone, and email support to minimize downtime.
- Develop, standardize, and maintain reusable operating system images to accelerate deployment cycles and ensure consistency across the device fleet.
- Coordinate the responsible disposal of electronic waste (e-waste) and ensure endpoint configurations remain secure, compliant, and aligned with organizational standards.

IT Support Analyst — PAR Technologies | San Diego, CA **June 2023 – March 2026**

- Delivered Tier 2 enterprise IT support to a distributed user base of 1,000+ (scaling to 5,000+ across multiple campus locations), resolving escalations from Tier 1 help desk teams while maintaining high system availability and user satisfaction.
- Managed 20–40 support tickets weekly through JIRA, maintaining detailed documentation and consistently meeting SLA-compliant response times to reduce backlog and improve queue efficiency.
- Diagnosed and resolved complex LAN/WAN connectivity issues using tools such as ping, traceroute, and ipconfig, and troubleshot network hardware including routers, switches, and wireless access points.
- Provided remote and end-user support for VPN, Wi-Fi, and remote access, managed web content via Windows Server and IIS, and escalated complex incidents to Tier 3 senior engineering teams when necessary.
- Applied structured troubleshooting methodologies to identify root causes and implement sustainable solutions, coordinating with Endpoint Management, Networking, and Service Desk teams on cross-functional issues.
- Authored and maintained Standard Operating Procedures (SOPs) that reduced repeat incidents, collaborated with development teams during software QA testing to document and escalate bugs, and coordinated vendor support for repairs.

IT Help Desk Technician — Evans Hotels | San Diego, CA **September 2022 – June 2023**

- Delivered on-site technical support across 3 hotel properties, resolving hardware, software, and network issues on Windows 10/11 systems to minimize operational downtime in a fast-paced hospitality environment.
- Resolved an average of 30+ support tickets weekly using Autotask, maintaining detailed documentation and consistent response times throughout the ticket lifecycle across all properties.
- Managed the full user lifecycle and asset administration across Microsoft 365, Azure Active Directory, and on-premises Active Directory, including account provisioning, deprovisioning, licensing, and access control.
- Administered corporate mobile devices through MDM, supported Microsoft Teams collaboration tools and telephony services, and monitored server/endpoint health using DATTO and proactive system checks.
- Developed internal tools using HTML and PHP to streamline workflows, and maintained software and hardware asset inventories with lifecycle planning, upgrades, replacements, and compliance tracking.
- Authored SOPs and knowledge base articles to improve onboarding and knowledge transfer and partnered with third-party vendors to coordinate issue resolution.

Software Engineering Intern — Prospero.AI | Remote **June 2021 – September 2023**

- Assisted in building full-stack applications using React, and Node.js, enhancing overall functionality and application performance.
- Partnered directly with the CIO to design and implement key product features, aligning development efforts with core business objectives.
- Proactively identified and resolved bugs and performance bottlenecks, improving application stability and the end-user experience.
- Collaborated within a remote engineering workflow, using Git for version control and coordinated code contributions.
- Supported testing and quality assurance efforts to ensure new features met performance and reliability standards prior to release.

EDUCATION

Bachelor of Science in Psychology San Diego State University — San Diego, CA

Certifications & Training

- AWS Certified Cloud Practitioner — Amazon Web Services
- Google IT Support Professional Certificate — Google
